

Lab #5

Section 1 – Chapter 9

Write a program that reads a whole number and catches `InputMismatchException` if this number is not an integer.

Print out **“Enter a whole number.”**

If number is not an integer

Print out **“Not a correctly written whole number”**

Print out to the file **“Try again.”**

If number is an integer

Print out to the file **“You entered”** + _____

Section 2 – Chapter 10

Write a program that writes to a file `stuff.txt` and catches `FileNotFoundException` if it is not found. The program outputs:

Print out to the file **“Writing to file.”**

Print out to the file **“The quick brown fox.”**

Print out to the file **“jumped over the lazy dog.”**

Print out to the file **“End of program.”**
